

Med Spa Growth Operator

A 20-60-90 day operating plan for turning more inquiries into attended consultations - with speed, clarity, and a measurable owner dashboard.

THE OFFER	THE OUTCOME
Lead-to-speed, AI scheduling concierge, reactivation, conversion assets, paid demand, and an operator dashboard.	More qualified consultations attended - without adding another full-time front-desk hire before the system earns it.

Days 1-20: Stop the leakage

Install tracking, map the inquiry lifecycle, and make every paid inquiry reachable quickly.

- Source tracking, CRM stages, and call/SMS events
- Instant SMS and missed-call text-back
- Approved concierge FAQs and human escalation
- Lead-Speed Audit landing page and booking confirmation flow

Days 21-60: Create dependable demand

Use the repaired conversion system to produce measurable consultation demand.

- 3-5 creator/founder ad concepts against one offer
- Consent-aware reactivation and no-show recovery
- Weekly dashboard and 30-minute operator review
- Retargeting for site visitors and video engagers

Days 61-90: Scale what proves itself

Scale only after the clinic can handle the demand and unit economics are visible.

- Increase spend on winning creative and offers
- Add service-specific pages where demand supports them
- Launch referral and review capture after attended appointments
- Build the next quarterly content and promotion calendar

Owner dashboard

These are the numbers Meridion reviews with the owner every week. The point is not more activity; it is more attended consults from the right sources.

Metric	Decision it enables
Median first-response time	Is lead speed actually fixed?
Contact rate	Are inquiries reachable and routed?
Consult booking rate	Is the follow-up and offer converting?
Show rate	Is calendar efficiency protected?
Cost per attended consult	Can paid demand scale responsibly?
Consult-to-sale rate	Is the handoff from marketing to clinic working?
Revenue by source	Where should the next dollar go?

Safety and operating boundaries

The concierge schedules and routes. It does not diagnose, recommend treatment, promise outcomes, or collect unnecessary sensitive information. The clinic approves offers, prices, FAQ language, consent rules, follow-up cadence, and escalation contacts before launch.

Next step

Book a 15-minute Growth Operator Call. We will audit response speed, calendar flow, and paid-lead leakage, then decide whether the Foundation or Growth Operator engagement is the right first build.
